

D. Does the presence of a baseline model consistently enhance the explainer's performance?

Analysis of Performance and Influencing Factors in NVA SE

conclusion

1. Within the framework of INVASE, how do the following factors influence the explainer's ability to identify relevant features while discarding irrelevant ones?

- Baseline model may be redundant
- Existance of baseline model does not consistently improve the performance of explainer (in terms of TPR and FDR)

➔ Replace it

Analysis of Performance Influencing Factors in INVASE

Conclusion

1. Within the framework of INVASE, how do the following factors influence the explainer's ability to identify relevant features while discarding irrelevant ones?
 - D. Does the presence of a baseline model consistently enhance the explainer's performance?
 - Baseline model may be redundant
 - Existence of baseline model does not consistently improve the performance of explainer (in terms of TPR and FDR)
- ➡ Replace it
